

## **PLEASE KEEP THE ICE OFF**

The City of Hawarden would like to ask for your assistance in keeping the ice and snow off your meters. An accumulation of snow and ice could interfere with good air circulation around the gas meter and vent on the gas regulator. If this happens it may interrupt the supply of natural gas to your home or cause other serious problems.

We ask that you use a broom to clear away the snow. Please do not use a shovel to remove the ice and snow build-up or try to melt or chip the ice, as that could damage or break your meter. Also, icicles from the roof or gutter that hang over your meter can cause dripping water that can freeze and cover the meter.

If your meter does become encased with ice, please call the Public Works Department at 551-2565 and they can assist you in solving this problem.
